### "OUR FIRST DIGITAL NEWSLETTER LAUNCH!"

We've launched our first digital newsletter (or e-news) on 7th September 2020. The e-news is designed to keep our investors and stakeholders up to date with our progress.

**"A word from our Chief Operating Officer" - KENNETH CHEW**

While the pandemic created a new norm where visits and human interaction is kept at a minimal, we are committed to bring you our latest news.

The e-news is a great communication tool for us (operations) to bond with investors and stakeholder through regular and transparent updates.

## "TAIPING FARM HARVEST"

We are proud to announce that we've started harvesting in our Taiping Farm!

Pond T1 was harvested on the 22nd of September 2020 with 2196.80KG at 41 pcs per KG. (fig.1)

Pond T2 was harvested on the 28th September 2020 with 913.60 KG at 37.5 pcs per KG. (fig.2)

Both harvests are "partial harvest" and we expect to have more than 4,000 kg left in each pond.

Stay tuned for more harvesting news!

# "QQ TIGER PRAWN GO LIVE ON FACEBOOK"

A subsidiary of FDI Global, QQ Tiger Prawn was incorporated as a marketing arm to tackle both the domestic and international market.

Recently, Sam Thor our FDI Chief Marketing Officer (CMO) came out with idea to use QQ Tiger Prawn Facebook page to do live selling and sharing. He even came out with the idea of live cooking as well.

## ***INCREASING PRODUCTION CAPACITY***

We are building a TNB substation to increase our production capacity from 60% to 100% by early 2021. Initially, the build lead time take about **6 months** to complete, but after intensive negotiation with the sub contractor, we successfully negotiate and bring down the lead time to **3 months**.

The new substation, able to generate more than 1,000 Amperes of electrical load, will enable us to operate the Senarong Farm in Kuala Muda to it's full capacity.

## ***UPCOMING MOVE BY FDI...***

With our latest success in Taiping, we are again reassured that our farming method is successful and replicable, and with the support from the Johor State Government, we are aggressively pursuing suitable land for prawn farming in both Perak and Johor.
